1* The sleeves delivered in the present parcel are based on textile technology, therefore a minimal shrinkage can be found on the parts delivered. We recommend therefore to always test the delivered products on application to understand the best adequacy between the sleeve delivered it its free state and the length needed on the application to insure the function. In cas of conflict, the parts delivered in the present parcel will be considered as the reference length in terms of comparaison with future deliveries

Blanket statements of conformance are unacceptable for any test results.
